

# The Shining Star School Project in Nyeri, Kenya

## A Low Cost, High Impact Project

The Shining Star School had enormous potential. But its facilities were dilapidated, and too small.

The Global Uplift Project together with Mar Group built a playground for all students of this school.

The totality is a play environment that will provide thousands of children with tens of thousands of hours of vigorous, joyful play.

Without such play, children cannot develop properly.

Join us in our Goal of  
**LIFTING HUMANITY**
